REPUBLIC OF ZAMBIA
Central Statistical Office
2015 Rural Agricultural Livelihoods Survey (RALS15)

Informed Consent Form for Food Security Cooperative Agreement Surveys in Africa

This survey is part of a team effort at the Central Statistical Office aimed at studying options to improve crop production and marketing, and food consumption among smallholder farmers. Your help in answering these questions is very much appreciated. Your responses will be kept COMPLETELY CONFIDENTIAL to the maximum extent allowable by law. If you choose to participate, you may refuse to answer certain questions, or you may stop participating at any time. Your responses will be summed together with those of roughly 8,500 other households in Zambia and general averages from analysis will be reported. You indicate your voluntary consent by participating in this interview: may we begin? If you have questions about this survey, you may contact the Director, CSO headquarters in Lusaka. If you have any questions for Michigan State University about this survey, you may contact Dr. Judy McMillan at +1 517 355 2180.

SECTION 1: DEMOGRAPHIC CHARACTERISTICS OF HOUSEHOLD MEMBERS

1.1 Tell us about each of the members who were listed during the 2012 survey. Indicate if they are still a member in this household between May 2014 and April 2015. If this household is part of a polygamous family, ask only about the household members at this particular household. (Members from previous survey will be filled.) Names will be displayed of the members listed in 2012. Ask about each member. Number of members: **xx. Add any new members to the table who joined during the reference period.**

SECTION 2: FARM LAND AND USE

2.1 Enumerator: Tell the respondent that we would like to know about household farmland and use during the 2013/14 agricultural season. First ask all questions regarding land-use in Table 2.1 and then sketch ALL fields or plots that were cultivated (including rented in/borrowed in), rented-out or borrowed-out and land cultivated/managed on behalf of an absentee owner, by the household during the 2013/14 agricultural season. Include land cultivated, gardens, fallow land, orchards, virgin land, and all other land owned, borrowed, and rented. After sketching, sequentially number the fields following the instructions in the enumerator manual. For cropped fields, pure stand cassava fields are numbered last. Label (in words) on the sketch the land use of each field (land use categories on left).

2.4. Crop Management – Planting And Harvesting (all cropped fields in **MONO** or **CROP MIXTURE**). **EXCLUDE** gardens, fallow fields, and virgin land.

Enumerator: Transfer field numbers from Table 2.3.1 (p. 9) . Also, transfer crop and area from the sketch (page 6) into CROP, CMO1 CM02. Ask the following questions for all the fields the household planted as **MIXED CROPS** in the 2013/14 agricultural season. Calculate the quantity harvested in **kgs** for **seed cotton, Virginia tobacco, Burley tobacco, paprika and coffee**. Make “Comments” regarding actual information for these crops that the respondent gives for quantity and unit harvested so the information can be verified.

Enumerator: We would like to know about inputs received from the Farmer Input Support Programme (FISP). This will be helpful for estimating the potential dynamic effects of FISP. To do this we will need information from this season and before back to 2008/2009. It is not necessary to collect the fertilizer information for the previous season, only the seed.
